SHELL ON THE BORDER

ARKNASAS' PREMIUM CTF

MISSION

Our mission is to cultivate a strong cyber security community in the River Valley by connecting likeminded people, companies, and government agencies.

WHY

Cyber security is one of the fastest growing and highest paying careers in the nation. Many security professionals work remote and we believe a town once known as the gateway to the dangerous frontier west could also be a gateway for those working in the dangerous digital frontier. Ethical hacking isn't just a job. For many, it's a lifestyle. We hope to build the culture representing this lifestyle in the river valley.

WHAT

Shell on the Border is a three day premium cyber security event themed in a keyboard cowboy cyber neon aesthetic. It's a hacker's Disneyland. The event includes presentations, training, and is built around a capture the flag (CTF) competition. A CTF is an immersive hacking game where participants compete to hack systems and capture digital flags on these systems. We create an unmatched experience in the region. Past speakers include Arkansas Governor Hutchinson's appointed CIO, Yessica Jones.

PAST CTF TEAMS

Wal-Mart
Arvest Bank
University of Arkansas
Arkansas National Guard
